FOR IMMEDIATE RELEASE

The Exeter Police Dept. adds Crime Scene Reconstruction software to its arsenal

Through a recent grant from the SeacoastCrimestoppers.org, the Exeter Police have added specialized software to their investigations unit. The software created by ARAS 360 Technologies Inc. is a top of the line Crime Scene diagraming and reconstruction product. With this software, the Exeter Police will have the ability to create incident scene drawings, create 3D scene environments, generate 3D animations, and other functions integral to computer based incident investigations. While there are two other departments in NH that utilize ARAS 360 software solely for accident reconstruction, The Exeter Police Dept. is the first agency in NH to solely utilize the Crime Scene software or "CSI module" of ARAS 360.

The use of the software is expected to assist in the ability to locate possible suspects through detailed reconstructions of crime scenes and strengthen and support evidence found at crime scenes for documentation purposes. It is also anticipated that such a professional reconstruction of crime scenes and evidence utilizing a 3D replay of the actual crime in the
